Opis produktu

The Nitecore HC35 headlamp has an impressive maximum output of 2700 lumens from the 4 x Cree XP-G3 S3 LED. The light

has a range of battery options; choose from using the included 21700 li-ion or alternative 21700 with an output of 8A, an 18650 li-ion with an output of 8A, 2 x CR123 single use or RCR123 (16340) li-ion cells.

The HC35 offers a range of sought after features, including a micro USB port on the head of the light for recharging either a 21700 or 18650 battery inside the headlamp itself, removing the need for a separate, external charger.

The headtorch has the same L-shape that has made the HC30 and HC33 lights so popular. The HC35 has a detachable bracket so the light can be interchangeably used as either a headlamp or hand held torch. Additionally, the light comes with a pocket clip and a magnetic tail cap for other attachment options.

The Nitecore HC35 has a simple user-friendly interface made up of one button on the head of the light which controls all five brightness levels and three special modes.
