Opis produktu

Nitecore UT27 800 lumen Rechargeable Running Headlamp.
The Nitecore UT27 stands out as a bright lightweight headlamp designed for running, with insights from professional trail

runners across the globe. It features both white and warm light options. The white light spans an impressive 144 yards and yields an output of 500 lumens, ideal for outdoor pursuits like trail running, hiking, and nocturnal strolls. Conversely, the warm light extends up to 136 meters with the same 500-lumen output making it excellent for penetrating challenging weather conditions like rain, snow, or fog. By combining both lights on Turbo mode, an astounding 800 lumens of brightness emerges, casting a seamlessly uniform beam that reaches 175 yards. The UT27 further offers a red light mode, switchable between a steady glow and a flashing signal, facilitating awareness of your surroundings. Effortless toggling between light options and brightness adjustments is enabled through the user-friendly dual switches.
