Opis produktu

MIKROTIK CRS318-1FI-15FR-2SOUT

With netPower 15FR switch you can forget about expensive GPON base stations and optical splitters. This switch is a part of our GPEN concept - aimed to bring the speed and versatility of fiber networking while using the advantages of Ethernet. It is an easy to deploy, low-cost way for any ISP to deliver the Internet to individual apartments.

You don't have to worry about power options in the attic or the utility room - netPower 15FR has 15 reverse PoE ports. Depending on your setup, netPower can draw the necessary power even from a single client! Another Ethernet port has PoE-out - you can use it to power an aggregate link such as our Wireless Wire Dish or a security camera, for example.

There are two SFP ports for fiber connectivity. The outdoor enclosure allows you to install this switch in all kinds of environments - from damp attics to elevator shafts and different poles with hose clamps. netPower 15FR - bringing the cost down and the speed up!

netPower 15FR has a non-blocking throughput of 3.6 Gbps, switching capacity of 7.2 Gbps and forwarding rate of 5.4 Mpps.

The power supply is NOT included with the product- must be purchased separately.
