Opis produktu

G.SKILL Aegis DDR4
DDR4-3000 CL16-18-18-38 1.35V, 16GB (1x16GB)

The Ideal Solution for Gaming PCs

Named after the powerful shield of Greek gods, Aegis symbolizes strength and power. This new addition of DDR4 memory to the AEGIS family of gaming memory is designed for upgraded performance and high stability on the latest PC gaming systems. Give the quality performance boost your gaming rig deserves, no matter the game. Whether it's FPS, RTS, MOBA, or MMORPG, let AEGIS Gaming DDR4 Memory be the strength of your gaming arsenal!

Designed for Gamers

Available from a standard starting speed of DDR4-2133MHz, give the performance of your system a boost by increasing the amount of transfers per second. Aegis DDR4 memory is compatible with the latest Intel Core processors and uses cutting-edge hardware technology to ensure smooth gaming for the newest games.

Built for Quality

Built with the highest quality of hand-selected ICs and tested with G.SKILL's rigorous validation process on all major performance motherboard brands, the AEGIS Gaming DDR4 Memory is designed for the best compatibility and stability the widest selection of motherboards.
