Nazwa modelu	wAP ac LTE kit (2024)
Objętność brutto	0.002576 cubm
Jednostkowa waga brutto	0.8 kg
CnCode	85176200
Głębokość opakowania wysyłkowego	28 cm
Waga opakowania wysyłkowego	0.8 kg
Unit Box Width	0.115
Unit Box Height	0.08
Strona główna dostawcy	mikrotik.com/product/wap_ac_lte_kit24#fndtn-specifications
Ilość w opakowaniu	1
Jednostkowa waga netto	0.6 kg

Opis produktu

wAP ac LTE kit is a tiny dual-band weatherproof wireless access point for installation outside your house, in the garden, on your porch, or in any other challenging environment where you need a capable wireless connection on a tight budget. Two Gigabit ports allow using the speedy built-in LTE modem as a mobile internet backup connection, in case you already have a wired ISP. The new revision features a new LTE modem that offers improved connectivity, the addition of the popular B28 band, and a serious price drop! wAP ac LTE kit is weatherproof and can be fixed to any external wall from the inside of the

case – for extra security and less visible attachments. The bottom part can also be secured with a special anti- vandal screw, which can only be opened by the owner. There is an opening in the back of the case, allowing you to run the Ethernet cable directly behind the unit and through the wall. This way the wAP attracts less attention and blends into any environment.
