Opis produktu

Managing outdoor wireless network has never been easier: mANTBox ax 15s can provide unparalleled wireless point-to-multipoint connectivity for a vast variety of devices over a distance of 20 kilometers! A potent combination of modern dual-core ARM CPUs, our latest 802.11ax Wi-Fi 6 dual-band radios and powerful built-in sector antennas will take your signal

stability, speed, and responsiveness to the next level! There's a Gigabit Ethernet port with PoE-in and an SFP port with 2.5 Gigabit support for extra fast fiber uplinks. Upgrading your setup to Wi-Fi 6 offers multiple benefits: Speed: we've seen up to 40% higher speed in the 5 GHz spectrum and up to 90% higher speed in the 2.4 GHz spectrum. Security: WPA3 encryption and management frame protection prevent all sorts of attacks, like bruteforcing and WPA2 handshakecapture deauthentication attacks. Reliability: seamless fast transition (roaming) enables smooth, non-stop signal when you have to switch between access points. Also, Wi-Fi 6 ensures a fair traffic distribution if the connection is shared by a large number of users. Energy efficiency: features like Target Wake Time reduce power consumption in the long run. Better for your wallet and the planet! mANTBox package includes everything you need: a Gigabit PoE injector, a power supply, a hose clamp and a fastening set, and the MikroTik quickMOUNT pro. This advanced wall mount adapter allows turning antenna within 140° both horizontally and vertically. With the quickMOUNT pro it is possible to perfectly set antenna alignment using an integrated graduated scale.
