Wrl Access Point Wire CUBE/CUBEG-5AC60AY Mikrotik

Cena	556,57 zł
Dostępność	Dostępny
Czas wysyłki	24 godziny
Numer katalogowy	1381197
Kod EAN	4752224000071
ManufacturerCode	CUBEG-5AC60AY
DDR3 1375	5 GHz
Wymiary	115 x 95 x 82 mm
DHCP	1
Objętność brutto	0.003053 cubm
Szybkość transmisji danych	433 Mbps
Jednostkowa waga brutto	1.04 kg
Category Code	WOD
Szerokość opakowania wysyłkowego	10 cm
Wysokość opakowania wysyłkowego	16.5 cm
Unit Box Length	0.185
DDR3 1600/1333/1066/800	CUBEG-5AC60AY
TXT	10 Watts
Zakres przysłony	-40°C to 70°C
Strona główna dostawcy	mikrotik.com/product/cube_60pro_ac
IEEE 802.11ac	Tak
Ilość w opakowaniu	1
Zysk energetyczny anteny	11.5 dB
Jednostkowa waga netto	0.6 kg
Obsługa blokady Kensington	256 MB
CnCode	85176200
Głębokość opakowania wysyłkowego	18.5 cm
Waga opakowania wysyłkowego	1.038 kg
Unit Box Width	0.1
Unit Box Height	0.165

Opis produktu

Cube 60Pro ac

A powerful point-to-point 60 GHz 802.11ay CPE for bridging distances up to 2.4 km.

Long gone are the days when you had to rely on cables for speed and stability. 60 GHz solutions offer fiber-like speed and stability - while saving you plenty of time and money on installation and maintenance. Our latest Cube 60Pro product line is taking the advantages of 60 GHz networking to the next level - with the 802.11ay standard for even higher distances, stability, speed, and convenience.

The Cube 60Pro ac CPE allows you to establish ultra-fast point-to-point connections over distances as far as 1 km. And that's not all - we have added Channel 5* support, so you can reach even higher distances if necessary. In our tests, the Cube 60Pro ac easily maintained a reliable connection over 2.4 km. Bridging two locations has never been easier!

You can get a preconfigured kit of two Cube 60Pro ac devices: the Wireless Wire Cube Pro. Just point the Cubes at one another and power them on! They will form a blazing fast encrypted wireless connection. Pure plug-and-play!

Forget about downtime with the automatic 5 GHz backup connection

The 60 GHz frequency is unaffected by the crowded wireless spectrum, it offers high speed and capacity. But it can sometimes struggle during bad weather conditions. That's why both Cube 60Pro devices feature an automatic 5 GHz failover. We have added a powerful directional antenna so that the 5 GHz range can keep up with the 60 GHz.
