Opis produktu

SEASONIC G12 GM-850

Seasonic G12 GM-850 is an ATX power supply designed for gamers, professionals, and PC builders who require stable, efficient power delivery. Featuring an 80+ Gold efficiency rating, this power supply ensures that your system remains energy-efficient, reducing electricity costs while minimizing heat output.

Reliable Performance
The G12 GM-850 is built with premium components that enhance its durability and reliability. It features Japanese capacitors and an advanced cooling system to keep your PC running smoothly during intensive tasks. With a single +12V rail, the power supply provides stable power to demanding components, ensuring that your CPU and GPU perform optimally.

Compact and Silent Operation
Designed with a compact form factor, the G12 GM-850 fits into most mid-tower cases, offering flexibility in building your PC. It also includes a smart fan control system that adjusts the fan speed based on temperature, ensuring quieter operation without compromising performance. This feature is especially beneficial for users who prioritize a quiet computing environment.

Optimized for Efficiency
The G12 GM-850 is equipped with a modular cable system that allows for neat and efficient cable management. By removing unnecessary cables, users can reduce clutter and improve airflow within the PC case. This modular design contributes to a cleaner, more efficient build, resulting in better airflow and reduced temperatures.

Advanced Protections
Safety is a priority with the G12 GM-850, which comes with over-voltage, over-current, and short-circuit protection features. These protections help prevent damage to your components in case of a power surge or failure, ensuring that your system remains safe during operation.

Perfect for Modern Systems
With a robust 850W power output, the G12 GM-850 is ideal for high-performance gaming PCs, workstations, and content creation systems. Whether you're running demanding applications or playing resource-heavy games, this power supply delivers consistent and reliable power to ensure your system operates at its best.
