Opis produktu

The CHIEFTEC VEGA Series power supply is built to Intel's ATX 12V 3.1 standard and supports PCIe GEN5 with 80PLUS Gold certified efficiency. It prioritizes a competitive price-to-performance ratio up to 850W while maintaining the trusted Chieftec quality.

The Vega Series features LLC Half-Bridge converter with DC-to-DC technology to provide enhanced power efficiency and stability. The equipped extra-long native black cables make it suitable for mainstream gamers to build their system, even in larger PC cases.

Additionally, its 135mm fluid dynamic bearing (FDB) silent fan optimizes the balance between cooling performance and noise levels. The Vega Series is your trusted reliable choice for all computing needs incorporating all necessary modern protection and safety features.
